October 2024

**Open invitation to hybrid TIBER provider event,
7 November 2024, 8:45-11:30 CET**

To strengthen cyber resilience, TIBER-DK facilitates Threat Intelligence-Based Ethical Red-teaming tests of critical infrastructure in the Danish financial sector. TIBER tests simulate advanced attacks by organised crime groups and state-sponsored actors in live production environments. Incorporating targeted, up-to-date threat intelligence, the tests apply realistic tactics, techniques and procedures. The ultimate objective is to increase cyber resilience across the financial sector in Denmark. The involvement and expertise of Threat Intelligence (TI) and Red Team (RT) providers is crucial in this pursuit. To strengthen the dialogue and mutual feedback with TI and RT providers, a forum for provider interaction has been established. Here, current topics within TIBER-DK and TIBER-EU will be discussed. Providers will be able to share experiences and discuss the TIBER-DK implementation of the TIBER-EU framework along with ideas and visions for future iterations.

This event will focus on generating learning in TIBER-DK from technical and geopolitical developments. In addition, updates on DORA TLPT, TIBER-EU and TIBER-DK will be presented and reflected upon. Knowledge and experience sharing will be facilitated. The initiative reflects the TCT's wishes to strengthen the important dialogue with and between TI and RT providers.

The provider event will be held in a hybrid format on **7 November 2024** from 8:45-11:30 CET. The agenda will be as follows:

- Morning coffee and light breakfast – *from 08:45*
- Welcome and introductory remarks – **at 09:00**
- Generating learning in TIBER from technical and geopolitical developments (*technical provider presentations*)
- Update on DORA TLPT, TIBER-EU and TIBER-DK, discussion and Q&A
- Thank you and future events

All providers are welcome to the event. It is not a prerequisite to have previous experience with TIBER tests.

This provider event will be held in a hybrid format. If possible, it is recommended to participate physically. We encourage physical participation at Danmarks Nationalbank in Copenhagen, but limit the number of physical attendees to two per provider in case of capacity issues. In such rare cases, participants will be informed, and it will always be possible for any additional participants to attend virtually.

In order to participate physically or virtually, please RSVP to tiber-dk@nationalbanken.dk, indicating the full names and e-mail addresses of all participants. Please also remember to specify the attendees who are expected to participate physically as only registered participants are allowed physical access.

The deadline for registering for physical participation is 4 November 2024. Physical attendees must present valid photo ID at the reception in Danmarks Nationalbank.

On behalf of the TIBER-DK Cyber Team, we hope to see as many attendees as possible at the fifth of a series of successful provider events.

The TIBER-DK Cyber Team welcomes suggestions for topics to discuss at future events, at which provider-led presentations of relevant insights are both encouraged and appreciated. To suggest topics or volunteer to present at future events, please reach out to tiber-dk@nationalbanken.dk.

Best regards,

TIBER-DK Cyber Team
